

General Prototype NAP

Cover page

Front matter

- a. Acronyms
- b. List of Tables
- c. List of Figures

Forward

Executive summary

Introduction

National circumstances

- a. The national economic, environmental and social context
- b. Key economic sectors and systems
- c. Climate change impacts: highlights of recent impacts
- d. Current relevant policies
 - a. Mandates guiding climate change adaptation planning
 - b. Data policy
 - c. Policies related to gender and vulnerable groups
 - d. Policies for relevant systems in the NAP (e.g. related to staple foods, energy, statements in the NDC, etc.)

Vision for adaptation for the country

Goal and objectives of the NAP

Regulatory frameworks and institutional arrangements for adaptation

- a. Governance structures/Institutions
- b. Plans for integrating adaptation and NAPs in development planning and plans

Processes supporting the development of the National Adaptation Plan (could be placed after national circumstances)

- a. Description of decision-making processes and how adaptation options are prioritized
- b. Multi stakeholder engagement process
- c. National roadmap and framework
- d. Guiding principles (science, ITK, gender, transparency and participation, etc.)
- e. Process of identification/stocktaking of desirable and available information
 - a. Climate and socio economic data and information
 - b. Current assessments: Exploring possibilities for further assessments
 - c. Policies, strategies, plans

- d. Existing initiatives on adaptation
- f. Resource mobilization for the process

Impacts, vulnerabilities and risks (short-, medium- and long term)

- a. Framework for national adaptation to guide assessment of vulnerabilities and risks
 - i. Conceptual framework of vulnerability and risk at various levels: national, system level, local level, etc.
 - ii. Boundary conditions for the assessment
 - iii. Focus on key systems/sectors
 - iv. Synergy with SDGs, Sendai Framework for DRR, and other relevant regional and national frameworks
- b. Baseline climate based on 1981-2010
- c. Current impacts, vulnerabilities and risks
- d. Projected future impacts, vulnerabilities and risks

National adaptation priorities

(To address the key impacts, vulnerabilities and risks covering the economy, environment and the social including gender, covering all adaptation needs including those being addressed already – the national adaptation portfolio/the national adaptation effort)

- a. XXXX
- b. XXXX
- c. XXXX
- d. XXXX
- e. XXXX

Climate change adaptation implementation strategy including costs

- a. National climate change adaptation programme: umbrella programme
- b. Projects and programmes to address key risks for the country
 - i. XXXX
 - ii. XXXX
 - iii. XXXX
 - iv. XXXX
 - v. XXXX
- c. Essential cross-cutting projects/programmes
 - i. Creating an effective adaptation process and system (mainstreaming/integration, policies, governance, etc.)
 - ii. Climate information services and early warnings systems, systematic observations
 - iii. Active monitoring of key systems: crop production, water resources, ecosystems, etc
 - iv. M&E system¹– individual projects and in aggregate for the country
 - v. Capacity development for implementation of adaptation and support to the process including data and information management, etc
- d. Mobilization of resources
 - i. Aligned with the GCF country programme,

¹ Mapped to goals and objectives, and targets where applicable; 5 types of metrics: inputs, process, output, outcome, impact

- ii. Other relevant climate finance mechanisms (internationalⁱ and domestic) and implementing partners
- iii. Technology
- iv. Capacity-building

Reporting, monitoring and evaluation framework

- a. Monitoring and evaluation system (mapped to goals and objectives, and targets where applicable; 5 types of metrics: inputs, process, output, outcome, impact)
- b. Reporting on progress on NAPs under the UNFCCC (through national communications/Adaptation Communications)
- c. Link to the NDC
- d. Reporting and outreach at the national level

Further development of an effective NAP process and updates to the NAP

- a. Data and system observations to support future assessments
- b. Roadmap (plan) for review and update of the NAP in five years
- c. Addressing gaps and needs

References

Annexes

- a. Data and information system to support the NAP
- b. Annotated reports, strategies, plans
- c. List of ongoing programmes and projects

ⁱ Adaptation Fund, LDCF, SCCF, etc.
