Training Background
Objectives
Content Overview of the four days training program
Workshop Objectives

The overarching objective of this workshop is to:

• Help countries make greater strides in their NAP process in the near future in formulating the NAPs.

• Inform current formulation of NAPs by facilitating a –
  o regional exchange,
  o providing guidance,
  o highlighting emerging best practices &
  o presenting existing tools that policymakers and technical government officials can use.
Key Elements of the workshop

• Focus in on days and information to support NAP processes
• Each session provides several take home key messages to guide near-term actions
• Sessions linked to LEG guidelines
• Sessions describe common barriers and how to overcome them with best practices and lessons learnt from existing NAPs and NAP proposals
• Applicable to NAP processes and NAP support proposals
# Content Overview of the four days training program

<table>
<thead>
<tr>
<th>DAY 1: Creating an enabling environment for risk informed decision making</th>
<th>DAY 2: Making use of climate-science and climate-relevant information to support decision making</th>
<th>DAY 3. Formulating NAPs (rational, Strategy, Checklist &amp; Reporting)</th>
<th>DAY 4: Addressing Bottle Necks in the NAP process</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Setting the scene and background on NAP process</td>
<td>5. Uncertainty and future planning – uses and limitation of future projections</td>
<td>8. Essential components to be included in the NAPs</td>
<td>11. Country needs – Country presentations</td>
</tr>
<tr>
<td>4. Strengthening the production and access to Climate data and information</td>
